

North RNC Provides Technical Assistance for School Of Character Applicants

On Monday, November 19, 2012, the Northern Regional Networking Center held a technical assistance session for schools contemplating making application for the State and National School of Character Program. Four schools from the region attended the program and received help from Eileen Dachnowicz, a national CEP consultant and Bill Trusheim, the president of NJASECD and Northern Region Coordinator. As we have found in our other meetings of the North RNC, the networking aspect of the meeting was very beneficial as representatives from different schools got together to discuss their programs as well as the process of preparing and application. Schools in attendance included the Hanover Park Regional High School District, Lakeland Regional High School, the Harding Township School, and the Black River Middle School. Several other schools from North Jersey are also preparing applications but could not attend the session due to scheduling conflicts.

We hope that the assistance provided was helpful to the schools in better understanding the process and that they will be able to celebrate with us as eventual Schools of Character!
